**Section 10: Stability and Reactivity**

**Stability:** Stable

**Materials and Conditions to Avoid:**
None known.

10.1 **Conditions to Avoid**
None known.

10.2 **Materials to avoid**
None known.

**Hazardous Polymerization:** Hazardous Polymerization will not occur.

**Hazardous decomposition or By-Products:**
Under normal usage conditions, hazardous decomposition products are not expected.

**Section 11: Toxicological Information**

According to testing, this product is considered low-toxic

**Section 12: Ecological Information**

**Ecotoxicological Information**
No relevant studies identified.

**Chemical Fate Information**

Section 16: Other Information

NFPA Hazard Classification
Health 0
Flammability 1
Reactivity 1
Special Hazards None

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short term acute exposure to a material under conditions of fire, spill or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.
